XSDForm Documentation

Overview

Ilerian XSDForm converts your XSD (XML Schema) to a web form on your web site. It gets xsd and an element, then it displays a form that fills the content of XML element.

The form sends the filled (prepared) XML string to specified web address. (Delivers xml).

Installation Guide

The XSDForm Installation Guide is for people who are installing XSDForm for the first time. Check the requirements and supported platforms, then download and install XSDForm on to your web server. Where to next? The XSDForm 101 will help you get started.

Developer's Guide

The XSDForm Developer's Guide includes all the information for configuring and integrating XSDForm into your web site. This is the main resource for using XSDForm.

Tutorials

We have video and walk through tutorials for impatient users on our Tutorials page.
